Bumjun Park *Ph.D. Student*

Seattle, WA bpark67@uw.edu (608) 250-9436 bpark67.github.io

0009-0008-0361-3810 bpark67

PROFILE

Doctoral student in Biostatistics. Undergraduate statistics major with certificates in mathematics and economic analytics. Interests in spatial, environmental statistics, functional data analysis, and phylogenetic modeling. Proficient in R and Python, competent in SQL and Julia. Native speaker of Korean and English. Intermediate level of Spanish and French.

EDUCATION

September 2023 – August 2028(expected)
Seattle, WA

University of Washington
Ph. D. in Biostatistics

September 2018 – May 2023
Madison, WI

University of Wisconsin-Madison
BS in Statistics, Cert. in Mathematics and Economic Analytics
(GPA: 4.0/4.0)

March 2015 – February 2018
Yongin, South Korea

Hankuk Academy of Foreign Studies
High School Diploma
(GPA: 4.0/4.0)

PROFESSIONAL EXPERIENCE

September 2023 – present
Seattle, WA

Research Assistant
Professor Eardi Lila, Department of Biostatistics, University of Washington

- Worked on a team led by Professor Mahmud Mossa-Basha, Department of Radiology, UW-Medicine and studied novel statistical methods such as multivariate functional data analysis methods for predicting ischemic stroke.
- Investigated and developed quantitative models for reclassifying Embolic Strokes of Undetermined Source (ESUS) using cerebral vessel wall MRI data.

September 2022 – May 2023
Madison, WI

Data Analyst
Professor Jonathan Patz Lab, Nelson Institute for Environmental Studies, UW-Madison

- Assisted researchers and graduate students at the Patz lab in preprocessing and processing data from projects in areas ranging from environmental policy, air quality, or epidemiology.
- Fitted statistical models such as spatial random forests to investigate the relationship between incidences of malaria prevalence in Kenya and vegetation coverage, insecticide-treated net distribution, precipitation, and livestock population.

May 2022 – May 2023
Madison, WI

Research Assistant
Professor Chris Zahasky, Department of Geoscience, UW-Madison
- Implemented web-scraping algorithms to collect data of per- and polyfluoroalkyl substances (PFAS) concentration levels provided by the U.S. Air Force, Wisconsin Department of Natural Resources, and other state-level environmental agencies.
- Provided data visualizations of the geo-statistical data and built an Inhomogeneous Poisson Process model to predict PFAS concentration levels after adjusting for opportunistically sampled data.

February 2022 – May 2023
Madison, WI

Research Assistant
Professor Stephen Gammie, Department of Integrative Biology, UW-Madison
- Collaborated with three other assistants to clean, preprocess, and analyze, RNA-sequencing gene expression data of mice with Alzheimer's disease, collected from multiple platforms to identify differentially expressed genes.
- Collected gene expressions data of Parkinson's disease and Alzheimer's disease patients, wrote and implemented programming methods to process the data, and fitted a machine learning classification model by identifying top-scoring differential gene pairs.

September 2019 – July 2021
Osan, South Korea

Aviation Control, Squadron Leader
2nd Squadron, 31st Air Defense and Control, Republic of Korea Air Force
- Served as the squadron leader, leading and representing 20 servicemen of the 2nd Control Squadron.
- Interpreted RADAR and GPS data and communicated with flight agencies to identify aircraft. Regularly presented and explained aviation data to other military officials and civilian pilots.

PUBLICATIONS AND PRESENTATIONS

March 16th, 2023

B. Park, H. Kang, W. Gnesda, and C. Zahasky. Groundwater Contamination of Per- and Polyfluoroalkyl Substances in the United States - Insights from an Ecological Sampling Bias Correction Method
American Water Resources Association - Wisconsin Section, Reconnecting with Wisconsin's Water and Water Scientists
Poster presentation of research project displaying a PFAS contamination risk map, applying bias correction methods of observer biases in echological sampling.

November 7th, 2022

B. Park, W. Gnesda, and C. Zahasky. Groundwater Contamination of Per- and Polyfluoroalkyl Substances in the United States — Insights from a Random Forest Model
Water@UW-Madison Fall Art & Poster Session
Poster presentation of research project displaying a national risk map of PFAS contamination.

November 2nd, 2022

T. Leffler, R. Hoffman, B. Park, J. Patz. Malaria Risk and Forest Cover Change in Kenya: A Geospatial Analysis
Planetary Health Alliance Annual Meeting 2022
Poster presentation inspecting the relationship between vegetation and Malaria in Kenya for which statistical analyses and visualizations were provided.

AWARDS

April 28th, 2022

UW-Madison Undergraduate Scholarship for Summer Study

June 27th, 2018

Wisconsin Alumni Association Korea Chapter (WAAK) Scholarship

Dean's List
2018 Fall, 2019 Spring, 2021 Fall, 2022 Spring, 2022 Fall, 2023 Spring

SKILLS

R Programming ●●●●●
Data visualization (ggplot2, plotly), processing (dplyr), Bioconductor packages(limma, GEOquery), R Markdown documenting, etc.

Python Programming ●●●●○
Data processing (pandas), visualization (seaborn), Uniform Manifold Approximation and Projection etc.

GIS ●●●●○
Processing raster or vector data for geostatistical analyses such as Triangulated Irregular Network, and formatting the data for use in R or Python

SQL ●●○○○
Querying and joining relational databases

CERTIFICATES

Certified Associate in Python Programming
Python Institute

COURSES

STAT512: Statistical Inference
Fall 2023 / Instructor: Ema Perkovic

STAT513: Statistical Inference
Winter 2024 / Instructor: Zaid Harchaoui

BIOST514: Biostatistics I
Fall 2023 / Instructor: Ken Rice

BIOST515: Biostatistics II
Winter 2024 / Instructor: Amy Willis

BIOST533: Theory of Linear Models
Spring 2024 / Instructor: Richard Guo

BIOST540: Longitudinal and Multilevel Data Analysis
Spring 2024 / Instructor: Gary Chan

BIOST555: Statistical Methods for Spatial Epidemiology
Winter 2024 / Instructor: Jon Wakefield

BIOST561: Computational Skills for Biostatistics
Spring 2024 / Instructor: Kevin Lin
